

# Website Accessibility Statement

## Need help reading our website?

We've added Browsealoud; from Texthelp to our website. Browsealoud helps you navigate around our site, understand our content and interact with our website independently.

## Try it out

Click on the orange '**speak**' button that you can see in the header of all our website pages. This will launch the Browsealoud toolbar that docks to the top of your screen. Now click on the first 'pointed finger' icon on that toolbar and then hover your mouse pointer over any text to hear it read out loud.

## Website Accessibility Speak Function

Our speak function offers a host of reading and translation support - helping you to access and understand our website better.

- **Text-to-speech:** click on or select any text to hear it read aloud
- **Translation:** written and spoken translations in multiple languages
- **Text magnification:** enlarges text and reads it out loud
- **Mp3 generation:** converts selected text into an MP3 audio file
- **Screen mask:** blocks distractions on screen with a tinted mask
- **Web page simplifier:** removes clutter from the screen, displaying only the main text
- **Settings:** customize options to suit individual needs or preferences

You can watch the Speak Function Video features under the following link [Browsealoud Features](#) to give you an introduction to use the service.
